CASE STUDY

50 QUALIFIED OPPORTUNITIES EVERY SINGLE MONTH IN ONE OF THE HARDEST MARKETS IN B2B

PARKING FACILITY OWNERS & OPERATORS

THIS IS A 30-DAY SNAPSHOT FROM THEIR INSTANTLY ACCOUNT — AND IT REPEATS EVERY MONTH

THE CHALLENGE

- One of the smallest and least reachable buyer pools in B2B — parking lot owners and operators
- Almost no digital footprint: thin LinkedIn presence, outdated websites, few verifiable contacts
- A finite market. When a campaign stalls you cannot simply buy more leads — there are none
- Low problem awareness. Most owners did not know compliance software existed at all
- Every agency they had spoken to called this market “not worth running outbound in”

THE STRATEGY

- Built the deepest owner/operator database available — scraped, cross-referenced and enriched from every source, not bought off a list provider
- Treated the market as finite: one master pool, rotated in structured cycles instead of burned in a single campaign
- Scaled to 50,000+ sends per month so a limited audience still produced daily conversations
- Led with liability exposure and lost revenue — never with software features
- Separate angles per operator type: private lots, mixed-use, municipal and third-party managed

HOW WE BOOKED THE APPOINTMENTS

- Every reply handled within 5 minutes, while interest is at its peak
- Multi-touch follow-up sequence (up to 8 touchpoints)
- Continuous re-engagement of non-responders — in this market persistence beats new lists
- Deliverability managed daily across dedicated infrastructure, because a burned domain costs opportunities that cannot be replaced

LET’S SEE THE ACTUAL NUMBERS

- CAMPAIGN WINDOW: 30 DAYS (REPEATING MONTHLY)
- EMAILS SENT: 50,500
- REPLY RATE: 2.5%
- TOTAL REPLIES: ~1,260
- QUALIFIED OPPORTUNITIES: 50
- EMAIL TO OPPORTUNITY: 1 IN 1,010
- PIPELINE VALUE TRACKED: $50,000
- CURRENT RUN RATE: 600 OPPORTUNITIES / YEAR
- INDUSTRY: Parking Compliance Software

WHY THIS RESULT MATTERS

This is not a big-market number. It is a hard-market number.

Fifty buying conversations a month, in a vertical with a fraction of the reachable contacts most companies enjoy — produced on repeat, not as a one-off spike.

If a system can manufacture this much demand out of parking lot owners, the maths in a normal market — better data, larger audience, higher awareness — is not close.
